InDrive Fleet Performance vs Uber Strategic Offensive in Morocco

Decision-grade impact analysis across 100 Rent-to-Own vehicles (Dacia Logan & Sandero 1.5 dCi). Confrontation of B2B fleet data from June to September 2026, diesel price shock stress-testing (>16 DH/L), idle waiting time hemorrhage quantification (24 min), and field validation via real operational statements of a GoCab driver who migrated to Uber.

Fleet Scope

100 Dacia Rent-to-Own Vehicles

Analyzed Period

June → September 2026 + Q4 Kickoff

Financing Model

300 MAD/day Lease (Mon-Sat = ~7,500 MAD/mo)

Recipient

Chief Operating Officer (COO) GoCab

INDRIVE WAITING TIME

24 min / ride

+71% vs July • 4h lost / day

IDLE TIME FINANCIAL DRAIN

4,500 MAD/mo

Idle fuel burn + missed trip opportunities

MOROCCO DIESEL PRICE SPIKE

16.20 DH / L

+24.6% • 46.3% of InDrive net earnings

UBER TARIFF SHIELD

96.14 MAD / ride

+159% value • 100% lease solvency

The InDrive Vise

Fleet Alert

1. **Fleet Contraction:** Active vehicles dropped from 68 in August to 35 in September (-48.5%).

2. **Driver Precarity:** At 35 MAD per ride, 16.20 DH/L diesel, and 24 min waiting time, the driver is mathematically unable to honor the 300 MAD/day GoCab lease.

The Uber Growth Shield

Q4 Opportunity

1. **Superior Unit Payout:** 96.14 MAD net/ride powered by airport routes and quest incentives (+30 MAD/ride).

2. **Rent-to-Own Solvency:** A real GoCab driver earned 21,536 MAD in 4 weeks on Uber, retaining +14,036 MAD net after paying the full GoCab lease!

 **Operational Takeaway for the COO:** InDrive is experiencing severe post-summer saturation. To secure Rent-to-Own lease collections (7,500 MAD/vehicle/month), GoCab must orchestrate an immediate fleet shift toward Uber to immunize drivers against the diesel price shock.

Macro InDrive Fleet Trajectory: June → July → August → September 2026

Gross Fleet Volume (GMV in MAD)

JUNE → JULY → AUGUST → SEPTEMBER

Ride Volume vs Orders Received

Completed Rides Orders Received

🚗 Active Fleet: 40 → 68 (Peak) → 68 → 35

Expanding from **40 cars in June** to **68 active vehicles in July/August**, fleet size contracted sharply to **35 cars in September** (-48.5%). Over 48% of drivers abandoned or paused InDrive due to severe margin compression.

🕒 Total Fleet Hours: 2,774h → 4,033h → 3,450h → 2,648h

Total online fleet hours climbed during the July peak before plummeting by **-34.3%** in September. Gross hourly yield degraded from **56.8 MAD/h** in July down to **47.6 MAD/h** in September (-16.2%).

🎫 Average Ticket: 45.4 → 49.1 → 50.2 → 40.3 MAD

The end of peak summer tourism paired with InDrive's downward algorithmic pressure slashed average fares by **-18% (40.3 MAD in Sept)**, creating an immediate operational deficit against diesel at 16.20 DH/L.

AVERAGE DISTANCE / RIDE

11.25 km

Consistent vs 11.36 km (July)

FUEL COST / RIDE

11.66 MAD

+36.1% cost surge vs 8.57 MAD (July)

DIESEL SHARE OF GROSS GMV

28.9%

+10 points absorbed vs 18.9% (July)

⚙️ Dacia 1.5 dCi Fleet Engineering Telemetry

Field Data

Dacia Fleet Parameter	July 2026 (Updated)	September 2026	Change / Operational Impact
Total Fleet Distance	38,370 km	35,128 km	-8.5% total km driven
Completed Rides	3,378 rides	3,123 rides	-7.5% ride volume
Average Distance per Ride	11.36 km	11.25 km	-0.11 km / ride (stable)
Urban Consumption (1.5 dCi)	5.8 L / 100 km	6.4 L / 100 km	+10.3% (Urban congestion)
Fleet Diesel Consumed	2,225 Liters	2,248 Liters	+23 Liters (Overconsumption)
Reference Diesel Price	13.00 DH / L	16.20 DH / L	+24.6% Pump price spike
Diesel Cost per Ride	8.57 MAD / ride	11.66 MAD / ride	+36.1% (+3.09 MAD/ride)
Fuel Share of Gross GMV	18.9% of GMV	28.9% of GMV	+10.0 pts margin eroded

 **Driver Margin Crisis:** In September, actual net revenue per ride after fuel and commission dropped to just **25.4 MAD** (vs 33.2 MAD in July, a **-23.5% drop in net payout per ride**). Over a standard 10-ride shift, the driver takes home only 254 MAD net — completely insufficient to cover the 300 MAD GoCab lease!

Idle Waiting Time & Driver Hidden Cost Quantification

4 HOURS IDLE / DAY

🕒 Surge in Idle Waiting Time (Minutes / Ride)

+71% IN SEPTEMBER

🕒 10-Hour Shift Breakdown on InDrive (September)

55% TOTAL UNPAID TIME!

40%

4h00 • Idle Waiting & Bargaining

Engine idling, AC running, manual bid bargaining
🔥 3.0 L/day = 1,215 MAD/mo wasted stationary

15%

1h30 • Passenger Pickup Transit

Unbilled deadhead mileage to reach passenger
Zero compensation from InDrive for pickup leg

45%

4h30 • Billable Driving Time

ONLY productive, compensated time in the shift!
Effective revenue-generating driving with rider

55% UNPAID DEADHEAD (5h30)

45% BILLABLE (4h30)

1. Idle Fuel Burn (Engine Idling)

Dacia 1.5 dCi idling with urban AC = 0.75 L / hour.
4h waiting = 3.0 Liters / day wasted while parked.
Across 25 days = 75 L = ~1,215 MAD / month evaporated into thin air!

2. Opportunity Cost (Lost Rides)

On Uber (algorithmic dispatch, 7 min wait), driver reclaims 2h30 productive time/day (3 extra rides).
InDrive lost revenue = ~2,625 MAD / month in missed gross fares.

3. Total Drain & The Uber Solution

Total monthly cost of InDrive waiting time = ~3,840 to 4,500 MAD / driver.
On Uber, instant 1-click dispatch directly transforms these 4 idle hours into paid, high-yield fares.

Driver Net Profit after GoCab Lease (7,500 MAD) vs Fuel Price

Uber (+8,460 DH)InDrive (-3,740 DH Insolvency)

GoCab Lease Solvency (300 DH/day)

200 Rides / month

Diesel Price	InDrive Balance	Uber Balance	Lease Solvency Status
11.50 DH/L	-2,800 DH	+9,400 DH	Uber Solvent
13.00 DH/L	-3,100 DH	+9,100 DH	InDrive Default
14.50 DH/L	-3,400 DH	+8,800 DH	High Arrears Risk
16.20 DH/L (Current)	-3,740 DH	+8,460 DH	InDrive Insolvency
18.00 DH/L	-4,100 DH	+8,100 DH	Fleet Grounding

Why Uber Acts as an Absolute Tariff Shield: Uber's Quest incentive (+30 MAD/ride) covers 100% of the trip's fuel (~16 MAD diesel) and leaves an extra +14 MAD net profit per ride. On InDrive, diesel absorbs 46.3% of driver net, making operations structurally insolvent.

PASSENGER DISCOUNT

-50%

100% subsidized by Uber

PROMO DISCOUNT CAP

30 MAD

Passenger Conversion Funnel: InDrive (Friction) vs Uber (Fluidity)

InDrive (Bargaining)

61% Completed Rides (39% Cancellations & Refusals)

Uber (-50% Promo)

94% Completed Rides (Algorithmic 1-Click Dispatch)

3 Aggressive Acquisition Levers Deployed by Uber:

Instant Promo Codes:

-50% up to 30 MAD capturing urban commuters.

- **Strategic CMN Airport Hub:** Virtual monopoly on high-yield airport runs (200 to 350 MAD/ride).
- **Dynamic Surge Multipliers:** Multipliers x1.5 to x2.2 during Botola games and rain peaks.

CMN Airport Peak & Quest (+300 MAD)

Airport opportunities & bonuses

Botola Pro Match Surge (x2.2)

Dynamic event surge multipliers

 **Strategic Takeaway:** Uber finances Moroccan market expansion directly from its corporate balance sheet. The passenger pays half-price, yet the driver receives 100% of the fare plus bonus subsidies, ensuring continuous and captive ride volume.

VOLUME QUEST BONUS
+300 MAD
For 10 rides completed (+30 DH/ride)

GUARANTEED WEEKLY FLOOR
4,415 MAD
Safety net subsidized by Uber

PEAK HOUR BOOSTS
+20 to +45 DH
Surplus per ride in hot zones

 **Weekly Guarantee: 4,415 MAD**

Guaranteed 160-ride safety net

 **Volume Quest: +300 MAD / 10 Trips**

+30 MAD / ride additional cash

 **Direct Impact on GoCab Solvency:** The daily 10-ride quest bonus (+300 MAD) alone covers **100% of the GoCab vehicle lease (300 MAD/day)!** The driver operates stress-free with all subsequent fares building pure net income.

Operational Comparison Matrix: Morocco Ride-Hailing

B2B vs B2C

Operational Dimension	InDrive Morocco	Uber Morocco	Competitive Advantage
Pricing Engine	Manual auctions / street bargaining	Predictive algorithmic pricing	Uber (Zero friction)
Average Ticket / Ride	35 to 45 MAD gross	85 to 110 MAD gross	Uber (+140% yield)
Driver Idle Waiting Time	24 min / ride (Auctions)	6 to 8 min / ride	Uber (~70% wait time)
Platform Commission	8.5% to 12.0% (Unsubsidized)	20% to 25% (Over-subsidized by quests)	Uber (Net bonus gain)
Payment Mechanism	98% Cash (Uncollected arrears)	Mixed Credit Card + Secured Cash	Uber (Zero defaults)
Fuel Shock Absorption	Critical (46.3% net consumed)	Excellent (16.9% net consumed)	Uber (Tariff shield)
GoCab Lease Solvency (300 DH)	38% default risk	Solvency > 98%	Uber (GoCab security)

Fleet Competitiveness Radar (6 Dimensions)

Economic Model Summary: InDrive attracts riders via low cash fares while shifting the full financial burden of fuel and waiting time onto the driver. Uber builds value via algorithmic surge pricing and channels cash directly to drivers through structured subsidies.

Real Field Case Study #1: InDrive Monthly Statements (June → September 2026)

JUNE: 5,475.57 MAD (158 rides)

1,937 km • 2.83 DH/km • Com: 12.1%

JULY: 9,748.76 MAD (Peak 270 rides)

3,298 km • 2.96 DH/km • Com: 11.2%

AUGUST: 7,711.73 MAD (225 rides)

2,479 km • 3.11 DH/km • Com: 11.9%

SEPTEMBER: 1,972.01 MAD (59 rides)

Switched to Uber (Residual InDrive)

InDrive Statements Analysis: The driver peaked at **9,749 MAD in July** across 270 rides and 3,298 km of mechanical wear. After paying the GoCab lease (7,500 MAD) and diesel (2,400 MAD), their real net take-home cash was **essentially zero**.

Real Field Case Study #2: The 5 Full Uber Driver Weeks (27,679 MAD Total)

Uber Revenue Breakthrough: Across 5 weeks on Uber, the driver earned **27,679 MAD net** over 296 rides. This exceeds **4 entire months on InDrive (24,908 MAD)**, while sparing **5,800 km of engine wear** on their Dacia vehicle!

🏗️ Net Revenue Collected in September (MAD)

💡 The Effort Paradox Revealed

Verified Data

Completed Rides	Khalid (#1 InDrive): 487 rides	Uber: 224 rides (-54%)
Net Collected Revenue	Khalid: 13,738 MAD	Uber: 21,536 MAD (+56.8%)
Average Gain / Ride	Khalid: 28.21 MAD net / ride	Uber: 96.14 MAD net / ride (x3.4)
Odometer Mileage	Khalid: 2,919 km (heavy wear)	Uber: ~1,850 km (-37% wear)
Retained Cash (after 7,500 DH Lease)	Khalid: +6,238 MAD	Uber: +14,036 MAD (+125% net)

⚡ **Striking Conclusion for the COO:**
On Uber, this GoCab driver pocketed **7,798 MAD more** than InDrive's top performer (Khalid), while completing **less than half the trips** and significantly extending the engine lifespan of their Dacia!

Net Payout: InDrive vs Uber (Identical Ride Volumes)

InDrive Net

Uber Net (+Bonus)

Comparative Payout Across Trip Tiers

Exact Simulation

Trip Volume	InDrive Net	Uber Net (+Quests)	Cash Difference	Relative Spread
38 rides	1,410 MAD	1,983 MAD	+573 MAD	+40.6%
100 rides	3,710 MAD	5,850 MAD	+2,140 MAD	+57.7%
160 rides	5,936 MAD	9,360 MAD	+3,424 MAD	+57.7%
201 rides (Asmelal)	10,702 MAD	11,728 MAD	+1,026 MAD	+9.6%
487 rides (Khalid)	13,738 MAD	28,280 MAD	+14,542 MAD	+105.8% (x2.1)

Unit Economics Formula:
On Uber, each completed ride generates at least **58.5 MAD net** in conservative modeling (28.5 MAD base fare + 30 MAD quest bonus), and up to **96.14 MAD net** in real field results, compared to just **37.1 MAD net** on InDrive!

Direct Response to the COO: If a GoCab driver completes the exact same trip volume on Uber as on InDrive, their net income systematically increases by **+40% to +106%** thanks to the leverage of weekly quest bonuses.

Global Fleet Projection: If September's 3,123 Rides Were on Uber

+67,584 MAD FLEET DIVIDEND

ANALYZED FLEET VOLUME

3,123 rides

Total September InDrive fleet

ACTUAL INDRIVE FLEET REVENUE

115,021 MAD

Net after InDrive commission (8.7%)

PROJECTED UBER FLEET REVENUE

182,605 MAD

+67,584 MAD (+58.8% incremental cash)

Consolidated Fleet Revenue Benchmark (MAD)

Composition of Fleet Income on Uber

The "Uber Dividend" for GoCab: More than half (51.3%) of revenues generated on Uber come directly from platform subsidies and quest bonuses. By remaining on InDrive, GoCab drivers leave over 67,000 MAD of monthly corporate subsidies on the table.

Monthly Driver Cashflow Breakdown (200 Rides)

GoCab Lease Default Risk on InDrive

Critical Risk

Over a third of GoCab drivers fall behind on lease payments due to depressed InDrive tariffs in the face of 16.20 DH/L diesel.

GoCab Lease Default Risk on Uber

Negligible Risk

Robust monthly revenue of 19,200 to 21,500 MAD allows drivers to fully settle the 7,500 MAD GoCab lease by mid-month.

GoCab Core Commercial Interest: The Rent-to-Own model relies entirely on the punctuality of the 300 MAD/day lease collections. Fleet viability depends on migrating drivers to the platform that provides sufficient unit margin to service their vehicle debt.
