FLEET PENETRATION & ASSET ALLOCATION

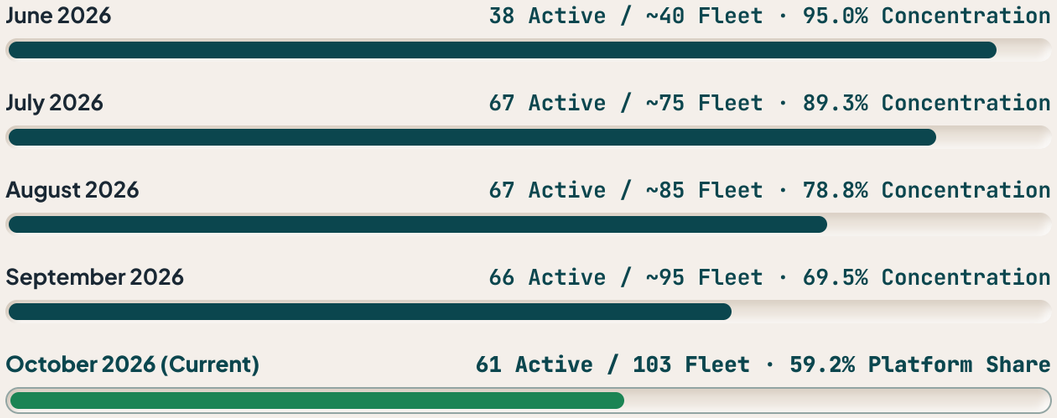

+157% Total Fleet Scale

Active inDrive Drivers vs. GoCab Total Fleet Growth

Analyzing how platform concentration evolved as GoCab expanded its overall vehicle fleet from 40 to 103 cars.

inDrive Deployment vs Overall Fleet Scale

Percentage of total GoCab fleet actively dedicated to inDrive operations.

Key Insight: GoCab started with an almost 1-to-1 correlation with inDrive (95%). As the fleet crossed 100 vehicles, GoCab matured into a multi-channel operator with drivers balancing private clients and multi-app shifts, while maintaining a reliable 61–67 car dedicated core on inDrive.

PRODUCTIVITY & WORKFORCE INTENSITY

+6.7% Output Surge MoM

Fewer Drivers, Higher Output — The October Inflection

Operational optimization enabled GoCab to extract record productivity per active driver in October.

RECORD MONTHLY VOLUME

102.1

Completed Rides / Driver

Up from 95.7 in Sept and 69.6 in July. First time GoCab drivers averaged over 100 inDrive rides per car in a month.

LONGEST SHIFTS RECORDED

6.71 h/d

Daily Supply Hours / Driver

A massive +13.0% increase vs Sept (5.94 h/d) and +1h47 per day vs June (4.92 h/d). Drivers demonstrated unprecedented platform loyalty.

TOTAL LOGGED HOURS

91.5 h

Monthly Supply Hours / Car

Up +3.2% MoM vs Sept (88.6 h) and +52% vs July (60.2 h). Full-time dedication expanded significantly.

The "Quality Over Headcount" Dynamics

In October, the registered inDrive car count reduced from 66 to 61 (-7.6%), yet total ride output barely moved (-1.3% from 6,316 to 6,231). Casual, low-intent drivers naturally filtered out, leaving a core of highly engaged drivers who drove 6.7 hours per day and delivered over 100 rides per vehicle.

FLEET RIDE OUTPUT RETENTION

98.7%

Maintained with 5 fewer active cars

QUALITY OF SERVICE & ACCEPTANCE

+4.4 pts DR Gain since June

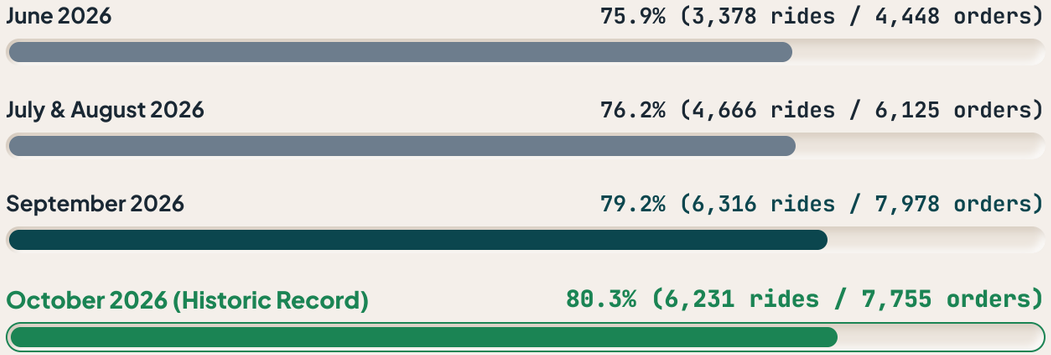

Order Fulfillment Reaches Peak Efficiency (80.3% DR)

Analyzing order acceptance, trip completion, and the steady reduction of ride cancellations.

Delivery Rate (DR%) Trajectory

Percentage of total offered inDrive orders successfully completed.

June 2026	75.9% (3,378 rides / 4,448 orders)
July & August 2026	76.2% (4,666 rides / 6,125 orders)
September 2026	79.2% (6,316 rides / 7,978 orders)
October 2026 (Historic Record)	**80.3% (6,231 rides / 7,755 orders)**

inDrive Partner Benchmark Target: **> 75.0%**

GoCab Outperforms by +5.3 pts

Core Drivers of Fulfillment Excellence

1. Driver Quality & Cancellation Elimination

The reduction in casual drivers eliminated speculative order bids. Drivers in October committed to bids they intended to complete, slashing passenger-side cancellations.

2. Strategic Hub Positioning

Drivers concentrated around core high-density hubs (Maarif, Centre Ville, Casablanca Port, Sidi Maarouf) reducing dispatch pickup distance and time-to-client.

3. High Vehicle Uptime via CRM Maintenance

Real-time vidange scheduling and repair ticketing in the GoCab CRM minimized roadside breakdowns and sudden ride interruptions.

Commercial Impact: Qualifies GoCab for Preferred Partner Status & Lower Platform Fees

FINANCIAL ANALYSIS & UNIT ECONOMICS

$115.3K Total GMV Generated

Gross Volume (GMV), Platform Revenue & Hourly Yield

Evaluating total financial turnover and understanding driver hourly revenue dynamics.

OCTOBER GROSS GMV

$25,590

Sept Peak: $27,667 (-7.5%)

INDRIVE NET COMMISSION

$2,426

9.48% Effective Take Rate

AVG GMV / ACTIVE DRIVER

$420 /mo

All-Time High (Stable vs Sept $419)

AVG HOURLY DRIVER YIELD

$3.98 /h

-5.0% MoM vs Sept ($4.19/h)

Deconstructing the Hourly Yield Evolution: From $5.39/h in June to $3.98/h in October

1. Off-Peak Hours Expansion

Drivers increased daily shifts from 4.9 hours to 6.7 hours (+36%). Operating in midday lulls and late evening hours naturally spreads rides over more hours, lowering statistical hourly earnings while maximizing gross daily take-home pay.

2. Longer Distance per Ride

Average trip distance lengthened from 9.2 km to 10.8 km (+17%). Longer inter-borough trips in Casablanca reduce total ride turnaround cycles, even while fare values remain steady.

3. Preserved Driver Solvency

Critically, monthly net driver turnover reached its all-time high of **$420 (~4,200 MAD)** per active car solely on inDrive. This robust top-line directly supports on-time weekly GoCab lease collections.

Annualized inDrive GMV Run Rate: **~$310,000 USD / Year (~3.1M MAD)**

GoCab Lease Payment Security Index: **STRONG**

Top Driver: 558 Rides

Workforce Distribution & October Top Performers

Pyramid breakdown by ride volume tiers and recognition of GoCab's top revenue-generating vehicles.

Driver Activity Pyramid (October 2026)

Breakdown of 63 registered inDrive vehicles by completed ride volume.

Elite Tier (> 300 rides / month)	2 drivers · 3.2%
Intensive Core (150 – 300 rides / month)	12 drivers · 19.0% (DOUBLED vs June!)
Standard Active (50 – 150 rides / month)	26 drivers · 41.3%
Casual Tier (1 – 50 rides / month)	21 drivers · 33.3% (Down from 68% in July)
Dormant on inDrive (0 rides in October)	2 drivers · 3.2%

Professionalization Achievement: 63.5% of inDrive drivers completed 50+ rides in October, vs only 30% in July.

October 2026 Fleet Champions (Top 5)

#1 · 26629-6-ي	258 hours · 8.89 h/day · DR: 89% · $5.5/h	558 rides $1,554 GMV
#2 · MA-39456-Y-6	448 hours · 15.45 h/day (Dual-Shift) · DR: 65%	369 rides $1,708 GMV
#3 · 15559-6-ي	173 hours · 6.42 h/day · DR: 84% · $5.1/h	290 rides $987 GMV
#4 · 40842-6-ي	183 hours · 10.18 h/day · DR: 82% · $5.3/h	257 rides $1,095 GMV
#5 · 964983WW	186 hours · 6.19 h/day · DR: 79% · $3.9/h	234 rides $787 GMV

Top 5 cars accounted for 1,708 rides (27.4% of total fleet volume) in October.

Recommendations for GoCab Executive Leadership

Four actionable initiatives to optimize fleet revenue, platform leverage, and driver retention.

1 Activate the 27 Non-inDrive Assigned Cars

Out of 88 assigned vehicles, only 61 generated volume on inDrive. The remaining 27 cars operate solely via private rentals, street hail, or other apps.

Expected Impact: Enforcing inDrive installation and a minimum 30-ride monthly threshold on these 27 vehicles unlocks an additional **+$8,000 to $12,000 USD** in monthly fleet GMV (+35% expansion).

Priority: HIGH · Fleet Ops

2 Incentivize the Casual Tier (<50 rides)

21 drivers completed fewer than 50 rides in October. Moving this cohort from casual status into the 100-ride bracket represents the lowest-cost growth lever.

Incentive Scheme: Introduce a 150 MAD CRM weekly lease credit for any driver completing 25+ inDrive rides per week, ensuring higher car utilization and reduced lease arrears.

Priority: MEDIUM · CRM Retention

3 Commercial Commission Rebate Negotiation

GoCab delivered an exceptional 80.3% Delivery Rate (DR%) and 6,200+ monthly rides, making it one of inDrive's premier fleet partners in Morocco.

Negotiation Target: Leverage this track record with inDrive's Regional Partnership Team to secure a 2.0% fleet rebate or priority dispatch status for GoCab vehicle IDs.

Priority: HIGH · Commercial / BizDev

4 Automate inDrive Data Sync into CRM

Replace manual spreadsheet exports with an automated pipeline syncing inDrive partner metrics directly into the GoCab CRM vehicle and driver drawers.

Risk Prevention: Early detection of drivers falling below 3 hours/day allows immediate field intervention before payment arrears accumulate.

Priority: MEDIUM · Tech / Engineering
